## Term 1 2017

# Year 4

### Musical Instrument

#### Fact File

With continuing ukulele tuition this term we would like you to select a musical instrument of your choice and create a 'Fact File' for it. You could find out when it was first used, how it has developed over the years, what it is made of, who is renowned for playing it, and so on. Don't forget to include a picture too. The research is endless! Present your findings carefully on A4 paper and we will create an informative class booklet.

### Fun with Numbers

- Design and make a fun game that will help you learn your times table (and related division facts). Bring your game in and share it with your friends.
- Look for patterns within multiplication facts that will help you extend the sequences.
- Write your own song and rhyme to help you remember those harder facts.

### The Wonders of Water

What can you find out about water? Perhaps you could bring in a story with a watery setting to share with the class? Or even write one of your own? Maybe you could paint a watery picture, write a poem, find out interesting facts or find out all the different ways in which water can be used! How much can you discover?...

### It's a Matter of Science!

Try to find out more about the three states of matter: solids, liquids and gases. Perhaps you could try to find out the answers to these questions:

- What happens to solids when they are heated?
- How can a liquid change state?
- Can a liquid change into a solid?

Present your findings in any way that you wish.

### Class Chef

Use your imagination to create a savoury or sweet dish using fresh vegetables or fruit, to reflect the current season of harvest. Present your recipe to the class in any way you wish. Don't forget to test it out!

### Extend and Challenge

Maybe there is something else related to your learning you want to find out about, create and share with your friends in the classroom. Have fun!
