Year 4

Term 3 2017

Fact Finding

In Geography we are beginning to look at some of the countries that make up the continent of Europe. Your task is to select a country of your choice and go 'fact-finding'! For example, what is its' capital city? Its' main tourist attractions? How many people live there? What does it produce? What are its' physical features? Find out about other people from that country, from the past or modern days. Then record your findings in a clear, well-organised piece of A4 paper so that we can laminate it and create our very own 'European Fact File'!

Compulsory Homework Dates

Friday 20th January
Friday 27th January
Friday 3rd February

Practise and Perform!

Find a short poem of your choice and rehearse reading it, using expression, gesture and tone of voice to 'bring the poem to life'!

Remember to practise 'projecting' your voice so that everyone in an audience could hear you. You may like to try memorising the words of your poem. You may even wish to share your performance with the rest of the class. We would love to hear it!

Electrifying Electricity!

Our Science topic is Electricity. **Make a poster, a rap, a comic strip or a leaflet... about the dangers of electricity and how to keep yourself safe.** There are some great websites for this. E.g. www.switchedonkids.org.uk

Terrific Time

Being able to tell the time is really important and we use clocks to help us in so many different ways during the day. Can you tell the time to the nearest minute? **Make a game that will help you learn about time.** Think about a real life situation where we use time to help you come up with a good idea for a game (bus timetables, duration of TV programmes, daily routine, time to cook food, time zones around the world...). We will look forward to playing your fun games!

Extend and Challenge

Maybe there is something else related to your learning you want to find out about, create and share with your friends in the classroom. Have fun!
