

# Home Learning Year 4

## Term 5 2018

### Are you a myth buster?

What is a myth? Where did myths originate? This term in English we are looking at Greek Myths, creating our own adaptations and performing some well know stories. You could do your own research, find your favourite myth and write a review! What did you like about it? Who is your favourite character? Do your family agree with you?

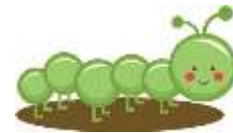

### Creature comforts

With our study of nature just around the corner do we really know what lives outside our homes?

Why not unleash your inner detective and investigate what types of creatures live nearby?

You could do this by creating tally charts, graphs or pie charts to show what and how many creatures are lurking outside.

You may want to think about what sort of things they need to survive. Creating insect homes that you think best suit the creatures outside could be a great way of understanding their habitats. Bring in photographs of your bug hotels and animal houses so we can share them with the class!

### Production Preparation

With the excitement buzzing for our class production it is time to get our acting hats on and take to the stage. Or maybe you feel the director's chair is more for you?

If you fancy your hand at script writing, you might like to write your own short script! You could use a story or myth you already know or come up with your own.

Don't forget to consider your characters, stage directions, expressions and gestures.

### Computing Challenge

### Extend and Challenge

Maybe there is something else related to your learning you want to find out about, create and share with your friends in the classroom. Have fun!
