

This is a series of optional tasks for your child to complete. This term, your child will be set compulsory tasks relating to our work in the classroom. You can be creative as you like with presentation, but please try and keep it in the Home Learning book.

We are still asking you to listen to your child read on a regular basis and class teachers may send home other short tasks, such as spellings to practise and maths activities, as required, to support children's learning in school. Thank you for your continued help with this.

Home Learning Term 3 2018

Year 1

This Term 3 in Science we are learning about Everyday Materials. Can you find an object at home that is...

- | | |
|----------|-------------|
| bendy | opaque |
| stretchy | waterproof |
| rough | transparent |
| smooth | hard |
| shiny | soft |

Take a photo, draw it or write about it. Your choice!

We will be learning about time this term.

Can you draw some pictures of key events in your day and tell us what time you would normally do them?

Re-tell a story you have read or even have a go at making up your own. Your story must have a beginning, middle and end! You don't have to write it - you could draw it, make a model, act it out or just tell it to someone else.

Can you design a board game that includes counting? You could design something like Snakes and Ladders, where you have to use adding and subtraction. Or a game using odd and even numbers....be as creative as you like!

Word hunt!

Next time you are out and about, can you spot objects/words that have these graphemes? Happy hunting!
