

## Gardening at Bridge School

Last summer, we developed the outside area of year 2 to enhance the children's' learning. Since September, , we have been learning about insect habitats and how different bulbs and seeds germinate. We continue to develop the area to work across the curriculum such as phonics, science and maths. We are always in need of compost, vegetables and plant donations. If you have anything in your garden that you feel would benefit our area and the children's' learning, please leave any contributions at the office. (A garden gnome would be very much appreciated!) We are hoping to build an outside wigwam with the children over the next year to link to our science topic in term 3 of comparing suitability of everyday materials for specific uses. Towards the end of the year, we will be using our very small pond area to further the children's' knowledge of habitats.
