

Home Learning Term 3 2018

Year 2

RE- Special buildings

In RE, we will be learning why the church is a special place for Christians. Can you create a picture of your special place?. You might like to take a photo. Why is it special to you? When do you go there?

2D and 3D shape hunt!

Look around your local area and home. What 2D and 3D shapes can you find - can you name them and talk to someone about their properties? (How many corners, sides, faces, vertices, angles?).

History

This term we will be learning about the Victorian period. As part of this learning we will be exploring inventors of the time. This will include learning key facts such as what inventions were made, who invented them, what impact they had on the country, do we still use these inventions today, or have they changed? As part of this learning, please could you research a Victorian invention and write about it - you might want to record your findings as a PowerPoint presentation, as you will have the opportunity to present your work to the class!

Science - Changing materials

In science this term, we are exploring everyday materials and their properties.

As part of your learning, you could make some jelly, cake, toast or boil an egg. How does it change? What happens? How could you record this? For example, step by step.
